Directions
1. Cut out the triangle. Help your child use it to trace and create more triangles, making enough to fill a full sheet of paper (about 20 triangles if using a standard 8.5” x 11” sheet of paper).

2. Using tessellations (the method of rotating, flipping, and sliding an image to create a repeating pattern) help your child create their own repeating pattern. Have them fill up the entire page, leaving no blank space.

3. Once your child’s pattern is complete, have them color in the triangles.

4. Hang up their creation for the family to enjoy!

Example of a Tessellation Using a Square
