November 20, 2020

Dear Majority Leader McConnell, Minority Leader Schumer, Speaker Pelosi and Minority Leader McCarthy:

The undersigned 60 education and related national associations **urge Congress to include in an emergency COVID-19 package the provisions in the HEROES Act 2.0 (H.R. 925), that would establish an “Emergency Connectivity Fund” to provide \$12 billion to schools and libraries to ensure that students and educators have Internet access from home and appropriate connectivity devices.**

As you know, the COVID-19 pandemic continues to disrupt teaching and learning across the country. In the last week, the escalating number of COVID cases has caused countless individual schools and entire school districts to close buildings and revert to fully remote learning.¹ When this pandemic began last spring, it exposed plainly the 15-16 million K-12 students and some 400,000 educators who lacked access to the connectivity and technology needed to teach and learn from home during this pandemic. Common Sense Media’s recent report, which is based on 2018 data, found that 37% of rural students and 21% of urban students lacked home Internet access. Additionally, the report stated that 35% of Native American students, 30% of Black students, and 26% of Latinx students had inadequate Internet access at home compared to only 18% of White students.² A second report from the Alliance for Excellent Education revealed that one in three families who earn between \$25,000 and \$50,000 do not have high speed home Internet.³ Finally, a third report from the National Education Association, issued just last month, found that 25% of all school-aged students live in households without broadband access or web-enabled devices (such as a computer or tablet).⁴

Given this clear, demonstrated need and the continuing educational crisis engendered by the pandemic, we assert that it is incumbent upon Congress to appropriate \$12 billion in short-term emergency funding to the Federal Communication Commission’s long-standing E-rate Program, as called for in the House passed HEROES Act 2.0. A program that schools know and trust, the E-rate

¹ States reporting school closures in the last week in response to the spike in COVID-19 cases include, but are not limited to: Alabama, Connecticut, Colorado, Georgia, Indiana, Iowa, Massachusetts, Michigan, Minnesota, Mississippi, Ohio, New York, Texas, Utah, Virginia and Wisconsin.

² See Common Sense Media’s report “[Closing the K-12 Digital Divide in the Age of Distance Learning.](#)”

³ See the Alliance for Excellent Education’s “Students of Color Caught in the Homework Gap” (Alliance for Excellent Education, National Indian Education Association, National Urban League, and Unidos US, 2020).

⁴ See the National Education Association’s report on “[The Digital Divide and the Homework Gap in Your State.](#)”

is the quickest, most efficient and, most importantly, most *equitable way*, to disseminate the funds to public and private schools and public libraries to help ensure K-12 students have Internet access from home and appropriate connection devices.

Congress must face up to this issue right now. As we wrote back in [April](#) and again in [July](#), *time is of the essence*. Every day that passes is another that students lacking remote access to school fall further behind. Additionally, many school districts are using online learning to deliver virtual access to after-school, enrichment and learning loss programs. **Without specific, targeted funds to help students who do not have Internet access at home** - whether it is Internet service, devices or both – **we are denying students the fundamental right to an education.**

Sincerely,
