April 29, 2020

On behalf of the undersigned organizations, we ask that you please leverage the federal funds in the CARES Act, as well as already existing federal, state, and local funds to incorporate high quality out- of-school time (OST) and summer learning. Access to OST and summer learning enrichment must play a critical role in the COVID-19 response to help our nation's students rebound and succeed when school resumes.

Under normal circumstances, the school summer break is not an idyllic vacation for many low-income children and youth. It creates many challenges for students who often lack access to basic needs such as healthy meals, a safe, supervised place to be while their parents work, and meaningful, engaging learning experiences. A [RAND Corporation report](#) of the Every Student Succeeds Act (ESSA) offers conclusive evidence that summer is an opportunity to close achievement and opportunity gaps – to help kids catch up, keep up and grow in meaningful ways. Now, as families live in isolation and suffer the economic fallout of this global health pandemic, this summer promises to be an extraordinarily difficult time.

[NWEA's](#) most recent student learning report, ***The COVID-19 slide: What summer learning loss can tell us about the potential impact of school closures***, confirms that “achievement typically slows or declines over the summer months with generally steeper declines for math than for reading, and the extent (proportionally) of loss increases in the upper grades.” Their report projects that with the COVID crisis, students may return in Fall 2020 with roughly 70% of the learning gains in reading relative to a typical school year, less than 50% of the learning gains in math, and in some grades, nearly a full year behind what we would observe in normal conditions.

Although summer and OST experiences may look different this season, we encourage local leaders to invest in engaging virtual learning models, and support quality professional development for educators while exploring creative community partnerships that ensure millions of students continue to learn, stay healthy and thrive this summer and when school resumes in the fall.

In order to mitigate this widening gap, it is critical that the federal funds provided by Congress be used to support high-quality out-of-school time learning opportunities now and this fall, as well as support targeted interventions for the country's most vulnerable students. Our organizations are encouraged by the passage of the bipartisan CARES (Coronavirus Aid, Relief and Economic Security) Act. Specifically, the CARES Act includes a \$30.75 billion Education Stabilization Fund that would run through the Department of Education to states, with \$3.01 billion for a Governor's Emergency Education Relief Fund, and \$13.5 billion for K-12 flowing directly to states and districts. In order to give states and locals enough flexibility to address the unique needs of their districts, the law includes a wide-range of allowable uses for these funds, including out-of-school time and summer learning opportunities.

Given the immense flexibility at the state and local levels, our organizations urge state and local elected officials to consider using these funds to support summer learning and out-of-school time programming in new and innovative ways to bolster learning and critical support families need during these uncertain times. We hope that we can lean upon your organizations to communicate the urgency of this matter to your members.

We offer the following recommendations:

- Meet with OST stakeholders to share solutions and strategies around this issue;
- Encourage State Education Agencies to provide robust guidance on continuity of learning in virtual environments combined with family engagement strategies and human services supports;
- Target interventions to address both projected major academic losses as well as social emotional supports;
- Coordinate with school, community, and municipal partners to ensure children continue to have access to free, nutritious meals during the summer months,
- Urge the corporate community to partner and reimagine summer youth employment, internships, mentorships and overall job readiness opportunities within the new COVID reality; and
- Partner with higher education institutions to develop strategies to mitigate the college "summer melt", where accepted and enrolled college bound students do not show up for classes in the fall.

There are dozens of organizations, both at the national level and with partners in all 50 states, ready and willing to help ensure our children do not fall even further behind. Leveraging federal funds for OST and summer learning is the first step in closing deep

equity and learning gaps that have been compounded by this crisis. We appreciate the opportunity to work with your organizations. The education and well-being of our nation's 55 million students is critical to this recovery effort and to America's future.

Sincerely,
